

ADRIAN AUGUSTYNIAK

QA ENGINEER

Hello, world!

<p>I took my first career steps in insurance. Then for over 4 years, I explored the secrets of marketing and promotion of the largest festival brands in Wrocław (European Capital of Culture 2016, The World Games 2017). Studies taught me economics, management, and analytical thinking. Working in the United States showed me how a corporation functions in a culturally different image. I packed my baggage of experiences and started my career path leading me to my new direction which is IT industry. I started to **create websites** and learn to code. In January I will start **QA engineer course** by Software Development Academy. Besides, I'm a positive and outgoing person with a lot of energy. Hard-working employee, who believes that there are no bugs that you can't fix.</p>
