ADRIAN AUGUSTYNIAK

QA ENGINEER

Hello, world!

<p>I'm Adrian. I took my first career steps in insurances. Then for over 4 years, I explored the secrets of marketing and promotion of the largest festival brands in Wroclaw (European Capital of Culture 2016, The World Games 2017). Studies taught me economics, management, and analytical thinking. Working in the United States showed me how corporation functions in a culturally different image. I packed my baggage of experiences and started career path leading me to new direction which is **IT industry**. I started to **create websites** and learn how to code. In January 2020 I will start **QA engineer course** by Software Development Academy. Besides, I'm a positive and outgoing person with a lot of energy and ideas. Hard-working employee, which believes that there are no bugs that you can't find and fix.</p>
